

OPEN STARTUP · PRE-SEED TRACK 2026

Find your home on WhatsApp.

Casa is Cameroon's AI-powered housing marketplace — connecting landlords and tenants where they already are, without downloading another app.

casahomelisting.com wa.me/237681279007 PropTech · AI · Marketplace

Finding a home in Cameroon is slow, risky, and informal.

Tenants (22–40)

Waste days chasing word-of-mouth leads, Facebook posts, and brokers. Pay for transport to visit places already rented or fake. Risk deposits with unverified landlords — especially when they must move in 2–4 weeks.

Landlords (30–55)

Units sit empty. Reach only their immediate network. Face unserious inquiries and lose rental income while waiting for a trustworthy tenant.

- People rely on friends, street brokers, Facebook groups, WhatsApp statuses, and “À louer” signs
- They love convenience but are sceptical of new apps — especially on slow, expensive internet

THE SOLUTION

A full housing marketplace inside WhatsApp.

Landlords list. Tenants search. AI assists. Trust is built in. No new app.

1. List

Landlords verify ID, set location, add photos + mandatory property video, and go live in EN/FR.

2. Search

Tenants search by neighbourhood, category, or natural language – residential or commercial.

3. Unlock

Pay 5,000 XAF (~\$8.80) once per listing to get the landlord's number and map link.

WHATSAPP-NATIVE

AI-ASSISTED

ID + VIDEO TRUST

BILINGUAL CM

MOBILE MONEY READY

Distribution and trust beat another housing app.

What fails today

- Play Store / App Store apps add download friction
- Facebook groups lack verification
- Brokers are opaque and expensive
- Heavy apps struggle on slow networks

Why Casa wins

- WhatsApp is already on nearly every phone
- Lighter than a native app
- ID checks + property videos reduce fakes
- Once it works, users become glued to it

Insight: Cameroonians will not install another app for a one-time housing search — but they will chat.

Cameroon first. Francophone Africa next.

Beachhead

Urban renters and landlords in

Douala

and

Yaoundé

, then Bamenda — students, young professionals, small-business owners, diaspora-supported movers.

Customer types

C2C marketplace · B2C unlock fees · B2B agents & commercial listings

Categories we play in

PropTech · Residential & commercial rental · Consumer marketplace ·
Conversational commerce · AI · Mobile

Expansion thesis

Same WhatsApp-first model travels to other high-WhatsApp, informal-housing markets across Francophone and Sub-Saharan Africa.

Live today – hybrid architecture, WhatsApp-first UX.

WhatsApp app

Conversation engine, menus, listing & search flows, unlocks, referrals, agent mode, alerts.

Trust layer

Claude Vision ID checks, mandatory videos, community flagging, admin moderation.

Platform

Express backend, Postgres, Redis queue, marketing site, admin dashboard – Railway hybrid web/worker.

AI

Listings, search, ID review

MoMo

MTN & Orange path next

Pay-per-unlock. Free to list. Built for occasional search.

Pricing

- **Tenants:**
5,000 XAF (~\$8.80) per listing unlock
- **Landlords:**
free to list
- **Agents:**
15% of unlock fee
- Launch mode: free unlocks while validating conversion

Unit economics (estimate)

- **CAC:**
~\$10 once paid social starts (cash CAC \$0 today)
- **LTV:**
~\$25 (≈ 2 unlocks $\times$ 1.5 search cycles)
- **Revenue mix:**
100% one-time today; subscriptions later
- **MRR now:**
\$0 – pre-recurring, early traction

Rationale: unlock fee is a small fraction of move-in costs and below what tenants often lose on fake leads and transport.

TRACTION

Live product. Early users. Clear next mile.

Honest stage

Pre-seed validation. Product works; sales motion is the bottleneck we are solving next.

First 100 users: Facebook housing groups → WhatsApp.

Repeatable acquisition hypothesis

- Post in Douala/Yaoundé “maison à louer” Facebook groups
- Convert to Casa WhatsApp chat
- Seed landlords first so tenants find listings
- Referrals + agent partnerships
- Campus / young-pro WhatsApp communities

12-month targets

- Month 6: 500+ users, 150+ active listings
- Month 9: MoMo live, 500+ paid unlocks
- Month 12: 5,000 users, 1,000 listings, 3 cities, ≥40% search→unlock

One hire that matters most: Sales / Growth Lead — own landlord & tenant acquisition.

Unique distribution – hardest thing to copy.

vs Native apps

No download. Works better on slow networks.
Meets sceptical users in an existing habit.

vs Facebook groups

Structured search, ID + video trust,
moderation, and durable listing inventory.

vs Brokers

Transparent fee, broader reach, bilingual self-serve flow, digital trail.

Moat path

Today: WhatsApp-native distribution + Cameroon localisation + trust stack. Tomorrow: network effects (more listings → more tenants) and proprietary rent / neighbourhood data.

Safer housing access – then cleaner communities.

Near-term social value

Reduce fraud and wasted search costs. Help families and small businesses settle faster. Formalise an informal rental market with verification and transparency.

Longer-term SDG path

With a WhatsApp-reachable user base, Casa can coordinate neighbourhood

waste sorting and collection

– supporting sustainable cities and responsible communities.

In 10 years, success means informal housing in African cities becomes searchable, trusted, and fair – not that a logo is famous.

Founder-built. Shipping in production.

Nkwain Nobert Ekfuingei

Founder & Developer

Built and launched Casa end-to-end: WhatsApp product, AI flows, trust features, admin, marketing site, and Railway production deploy.

How we stay accountable

- Weekly KPI scorecard (users, listings, unlocks)
- Weekly acquisition + conversion targets
- Monthly OKR-style review
- External commits with mentors/advisors

Validate sales. Turn on payments. Scale cities.

M1-2

MTN MoMo + Orange Money;
first paid unlocks

M3-6

Douala + Yaoundé density;
agents + referrals

M7-9

3rd city; path to ops break-even

M10-12

Waste-outreach pilot;
seed/grant for marketing

Why Open Startup Pre-Seed

We need mentorship on
sales and go-to-market

, structured validation support, and a path to early capital. Bootstrap target: ~\$800/month. Product is live — distribution is the unlock.
